Upper Second Class Honours in BA Criminology

WORK EXPERIENCE

Euro Communications Limited
Junior Front-End Developer
04/2024 – Present

- Creating, maintaining, and enhancing website functionality and visual appeal through well-organized, clear, and scalable source code, using **HTML**, **CSS**, and **JavaScript** with frameworks **Vue.js** and **Nuxt.js**.
- Implementing responsive web design principles to ensure the website functions across various devices.
- Creating and implementing my own UI/UX design mockups to the site.
- Collaborate with mid-senior developers in-person and use Git, GitHub Desktop, and GitLab for version control and seamless team workflows.
- Drive feature development and enhancement initiatives through planning and teamwork.
- Expanding skills in backend technologies (**PHP, Laravel**) and database management (**mySQL**), working as a full-stack developer to aid my front end tasks.
- Ensuring adherence to SEO best practices for front-end development.

Euro Communications Limited
Front-End Developer Intern
02/2024 – 04/2024

- Acquired proficiency in TailwindCSS, VueJS, and NuxtJS through self-directed learning.
- Delivered a complete application replicating a provided design, showcasing advanced front-end development skills.
- Gained hands-on experience in integrating modern frameworks and tools within development pipelines.

Previous Work Experience
5 years in retail, food services, warehouse operations, and charity sectors, building transferable skills in communication, teamwork, and problem-solving, throughout my academic career.

PROJECTS

Portfolio Site
https://neelamkhanportfolio.netlify.app/ | https://github.com/neelamkhan123/portfolio
This is a digital portfolio of my personal work, not including my professional work, showing a timeline of my skill development over the course of my projects, each one incorporating new technologies/frameworks. Coded in TypeScript + React + CSS.

Recipe Blog
https://recipe-blog-neelam-khan.netlify.app/ | https://github.com/neelamkhan123/recipe-blog
This project uses Firebase's Authentication to log users and allows the user to create and post recipes, delete them, and explore for recipes, using spoonacular API. Coded in TypeScript + React + CSS.

Monthly Budget Planner
https://github.com/neelamkhan123/budget-planner
This project incorporates Authentication, allowing the user to register and login, using the mySQL database to collect and distribute data. Coded in Laravel + JavaScript + TailwindCSS.
